EXPERIENCE

UNIVERSITY OF MINNESOTA FULL STACK BOOT CAMP

Graduated from the boot camp during summer of 2022. **Notable accomplishments:**

■ Sporting Event Finder

- As project manager of my group, we created a website that allows visiting users to quickly search for sporting events in a specific city on a particular day. Using weather and SeatGeek APIs, weather and ticket purchasing information is then accessible.

■ YouFoods

- I collaborated with my group to build the website known as YouFoods. Users can register and login to set up food shelters at particular locations. The location will then be displayed on google maps along with locations made from other users. Each location is marked and lists any needed supplies for that location.

■ Podcast Website

- As project manager of my group, we created a website where users can register, login, and share podcasts that they enjoy.

CERTIFICATIONS

Full Stack Web Development

University of MN CCAPS - 2022

EDUCATION

Bachelors of Science – Biology

University of MN – College of Biological Sciences

TECHNICAL SKILLS

-JavaScript - HTML – Bootstrap – MERN stack -

-Insomnia – Heroku – jQuery – CSS – MySQL -

PASSIONS

📖 Reading

🗣️ Learning New Languages

🎵 Musical Instruments

💻 Coding
